Summary

With prior experience in data analytics, Tableau, python and several other analytic and programming technologies, I am eager for an opportunity to bring my valuable skills to the table to help add value and solve problems in a data driven approach.

Projects

Customer Review Analysis

- Collected and analyzed customer reviews data of the British airlines
- Built an interactive dashboard in Tableau to show what services and aircrafts customers are most satisfied with

Financial Analysis of 1000 Companies

- I inspected and cleaned records of profit and expenditure data of different companies using excel
- I found a correlation between R&D, marketing spend and profit upon further analysis using python and it's powerful statistical tools
- Then I built a regression model trained on the data I analyzed that predicts profit with solid accuracy

Skills

- MySQL
- Tableau
- Excel
- Python
- HTML/CSS/JS

Education

CAC High schools
June 2022

Cisco Networking Academy
November 2024 ▪ Data Analytics

WorldQuant University
July 2025 ▪ Data Science
